Apache 4800 • charger + cable layout V3

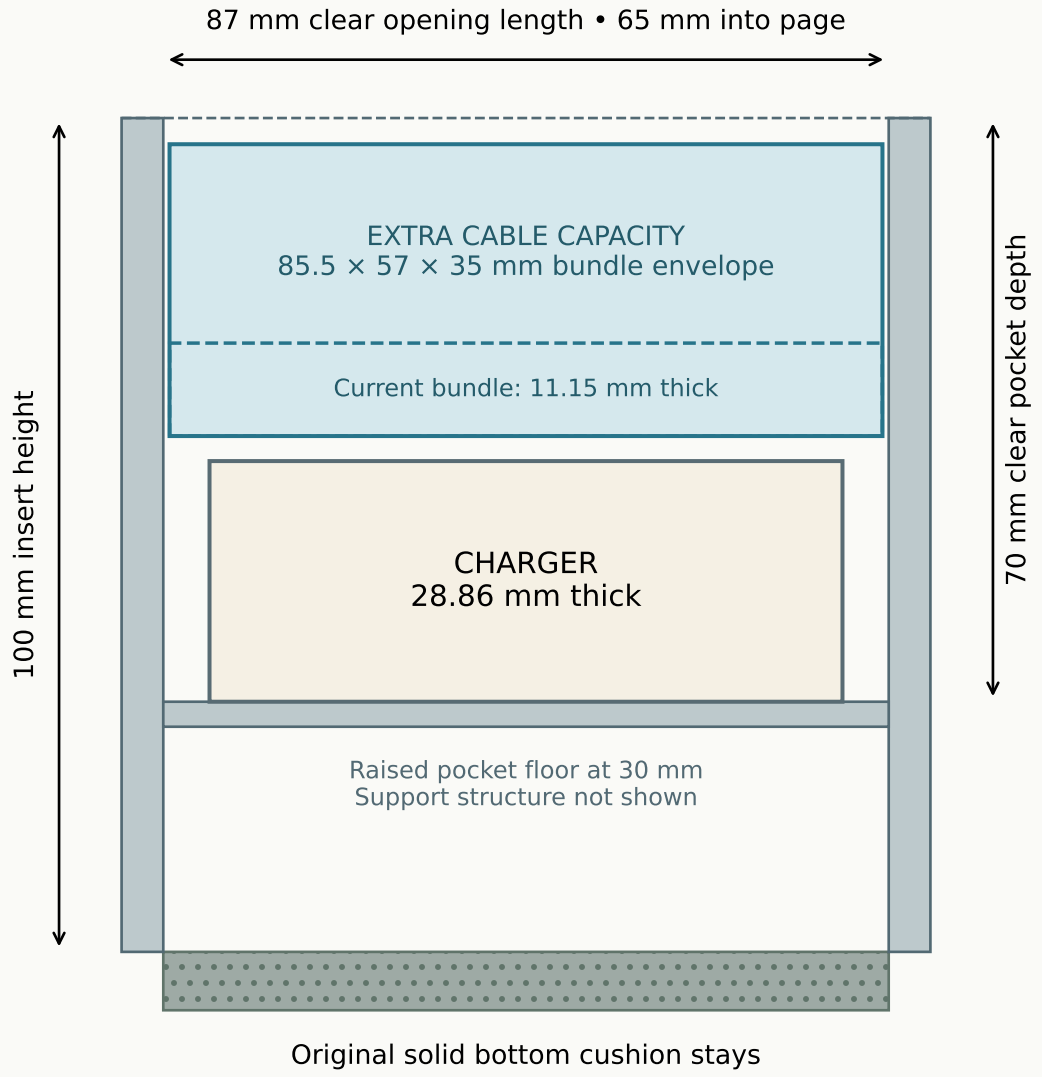

Both upper foam layers replaced by four PETG sections • solid bottom cushion and lid foam retained

Carabiners moved toward the corners • two 87 × 65 mm charger compartments • 70 mm depth allows a bulkier cable above each charger

Layout for review, not a final printable model. Equipment features and accessory outlines are schematic.
Measured cable bundle and larger 85.5 × 57 × 35 mm envelope checked in CAD. Physical packing and full-height fit untested.

Charger compartment • proposed vertical packing

Extra depth allows a bulkier loose coil; it does not guarantee a particular cable length.
3 mm packing allowance above charger and 3.14 mm clearance above the larger cable envelope. Physical fit untested.
